XMV660 VARIABLE SPEED DRIVES

XMV660

**Extreme innovation for
extreme environments**

2,3kV - 13,8kV

50-60Hz

Up to 50°C

The XMV660 NEMA3R is the most innovative, rugged and reliable outdoor medium voltage drive ready for 24/7 operation under the most demanding environments.

1

Topology

The XMV660 topology eliminates problematic peak voltages at the motor terminals, and other side effects such as excessive motor heating and stray currents through to motor bearings.

2

Maximum Motor Care

Power modules of 700V are connected in series to generate a quasi sinusoidal voltage low in dV/dt, supplying sinusoidal current to the motor with negligible THDi. Additional output filters are not needed.

3

Power Quality and Efficiency

XMV660 topology meets the most stringent regulations regarding power quality (IEEE519) and electromagnetic compatibility (EMC 2004/108/EC).

High efficiency $\eta > 96\%$ above 40% load (Including transformer).

4

Regenerative Capacity

The Power Electronics XMV660 regenerative drive is a high-performance device.

5

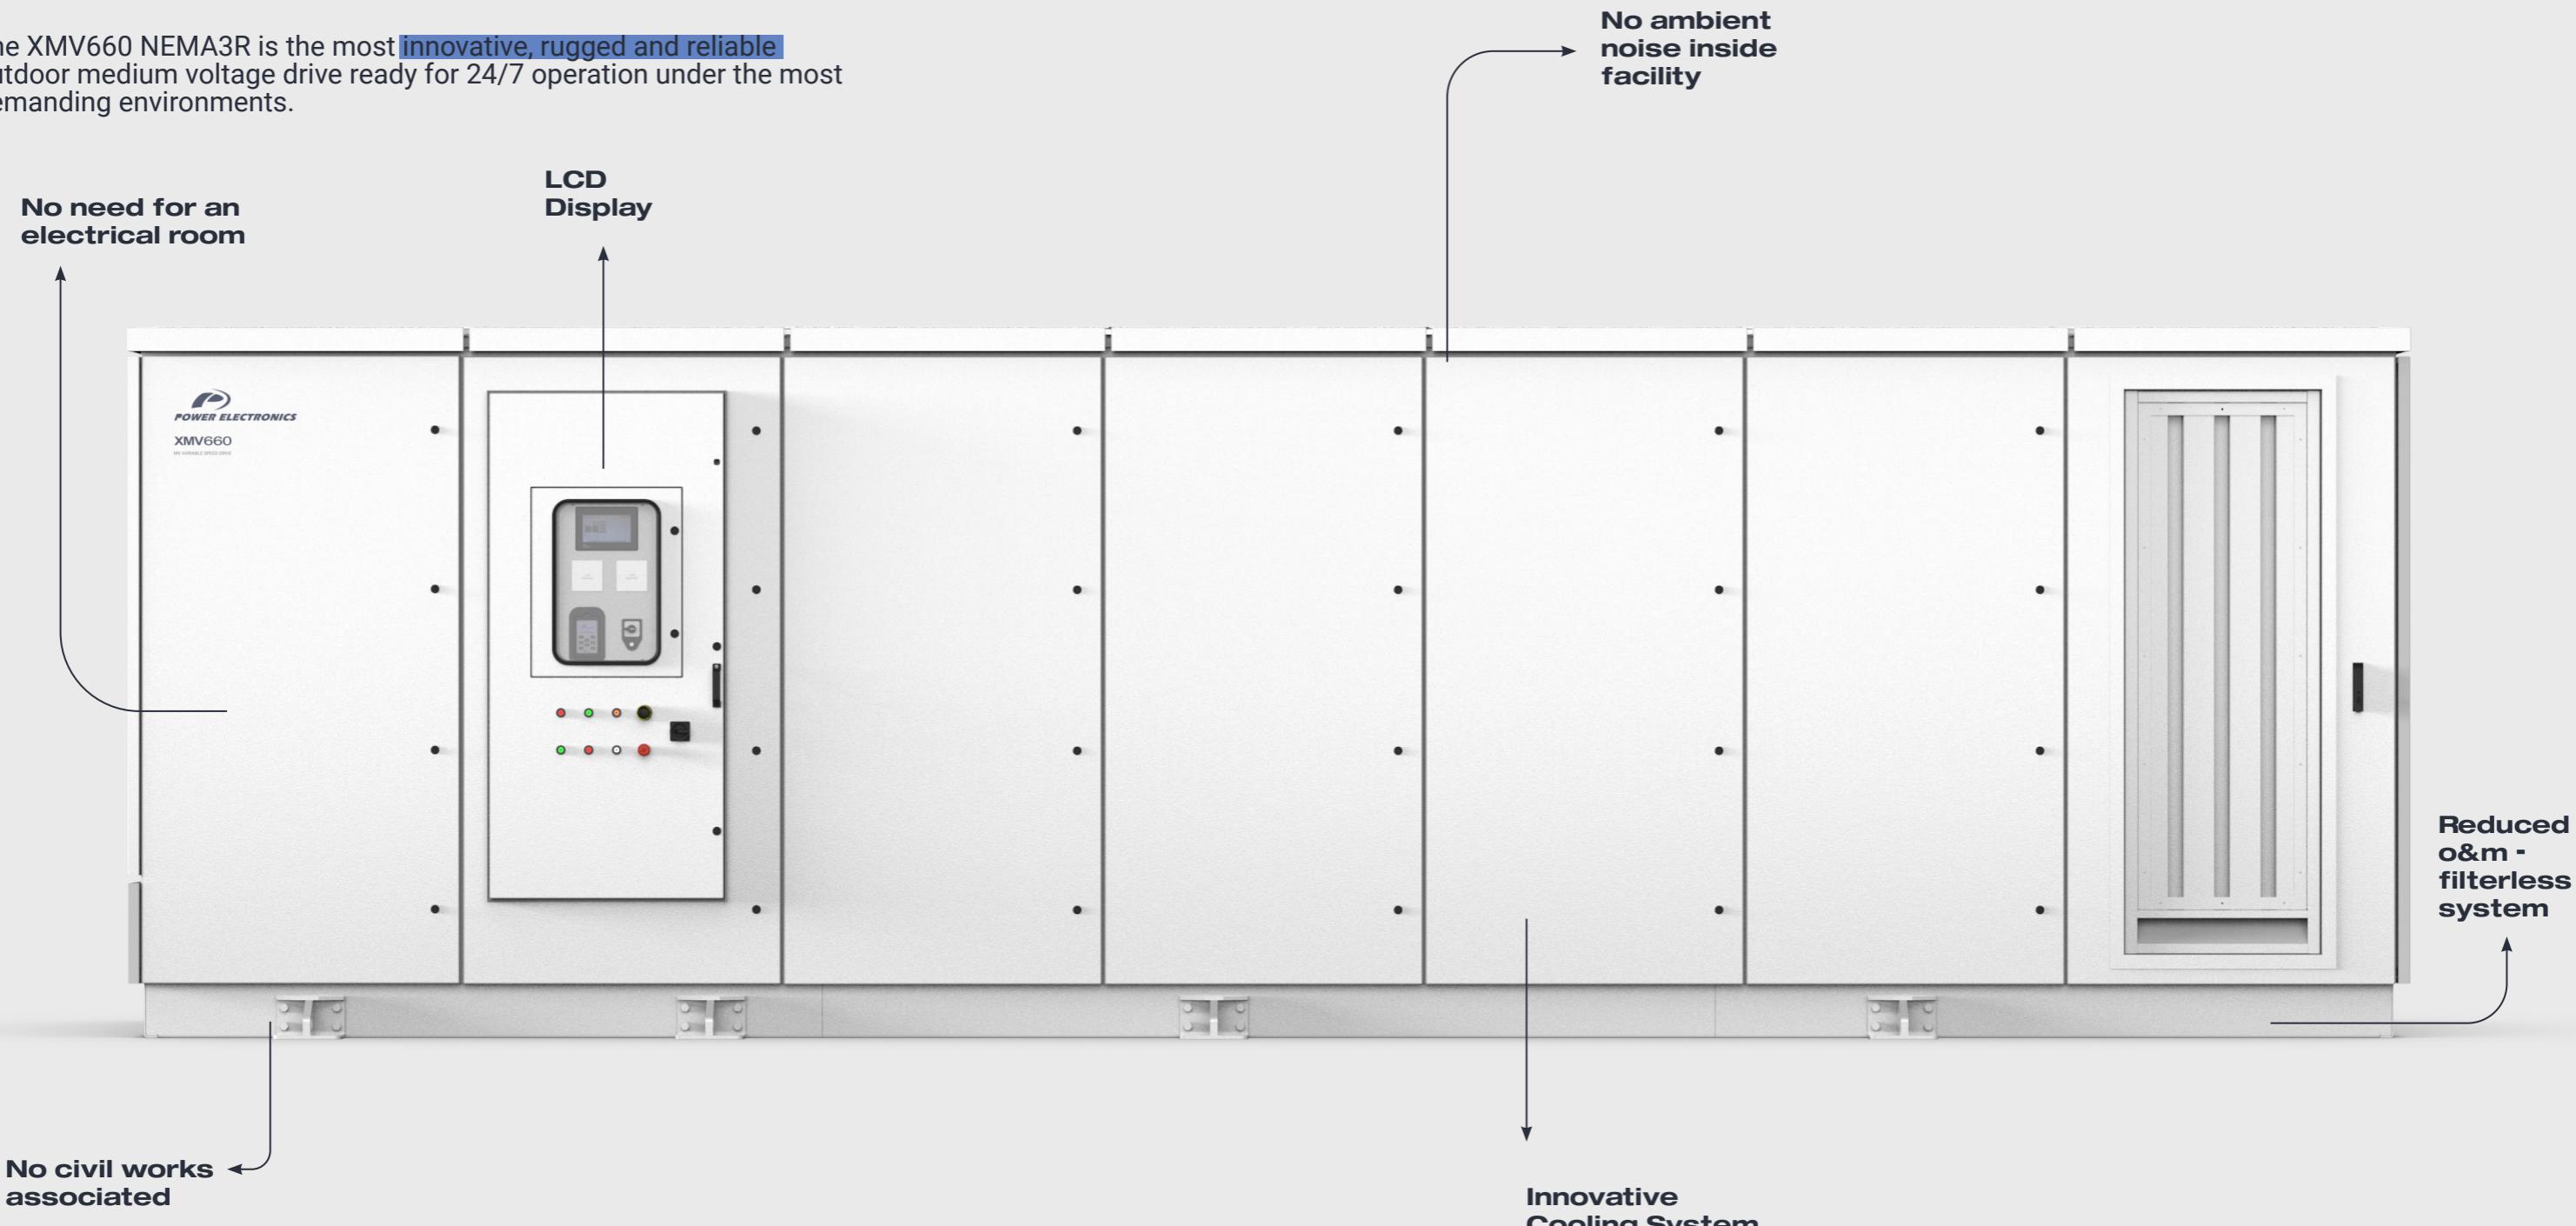

Safety & Protection

The XMV660 integrates built-in hardware and software protections that reduce the associated risk of medium voltage installations.

XMV660

Outdoor

The XMV660 NEMA3R is the most **Innovative, rugged and reliable** outdoor medium voltage drive ready for 24/7 operation under the most demanding environments.

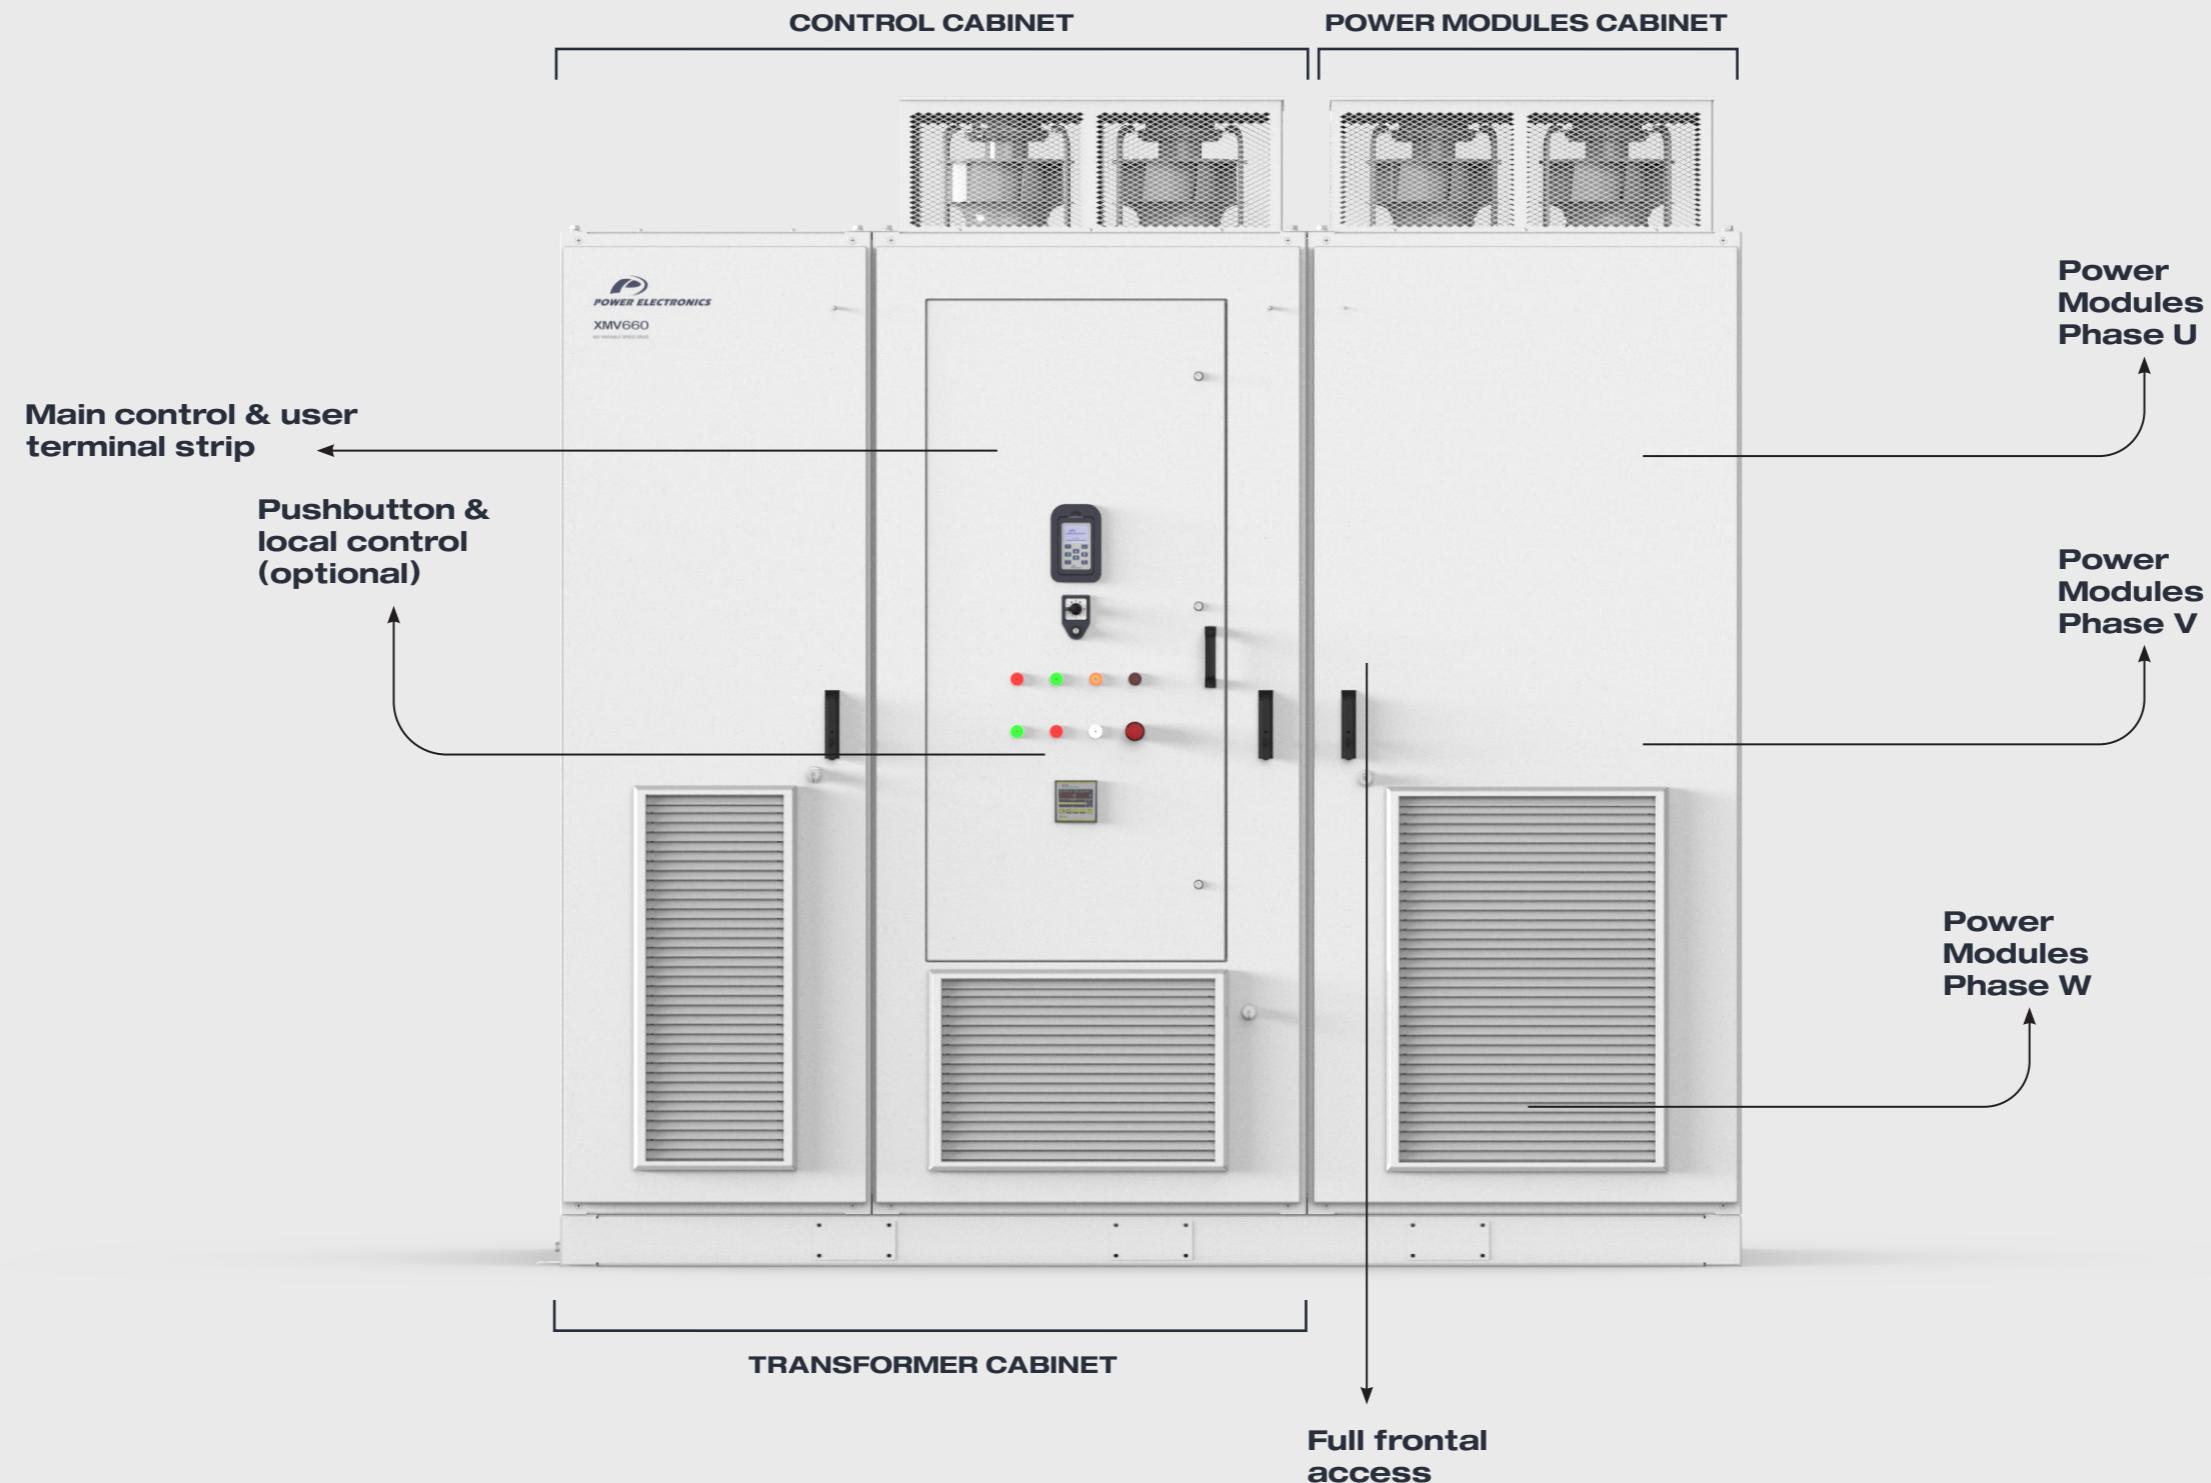

The innovative filter-less "cyclone drive" cooling system delivers a constant stream of clean air to the XMV660.

At the air intake, the labyrinth sifts the larger dust particles from the air stream, enabling the cyclone drive to eject the remaining contaminants, ensuring a constant flow of clean air into the electronics chamber and transformer cubicle without the need to maintain cumbersome dust filters.

XMV660

Indoor

The multistep quasi-sinusoidal output voltage produced by the cascaded H-bridge power modules is low in dV/dt and supplies sinusoidal current to the motor.

XMV660 OUTDOOR

INPUT	Input voltage (kV) [1]	2.3kV to 13.8kV ($\pm 10\%$)
	Frequency	50/60Hz ($\pm 10\%$)
	Power factor	> 0.95 (over 20% load)
	THDI (%) current [2]	< 5%
	Power transformer	Phase-shift transformer, dry type (Copper or aluminum)
	Voltage dip	Exceeds IEC/EN 61000-4-34
	Oversupply protection	Surge Arresters
OUTPUT	Technology	Multi-level, pulse-width modulation, low voltage power modules connected in series
	Pulses / power modules in series	18p/3, 24p/4, 30p/5, 36p/6, 54p/9
	Power modules (A) / (V)	120A, 200A, 300A, 400A / 600V-700V
	Current harmonic distortion (THDi)	< 5%
	Harmonic voltage factor (HVF)	< 0.019 (No motor derating required)
	Efficiency	$\geq 96\%$ (including transformer) @Pn
	Tripleless operation	Redundant Power System (RPS)
ENVIRONMENTAL RATINGS	Output voltage boosting	Transformer Tap Adjustment
	Degree of protection	(IEC60529) IP55, NEMA3R
	Operation temperature	-20°C to +50°C
	Storage temperature	-25°C to +55°C
	Humidity	< 95%, non condensing
	Altitude	<1000m; >1000m power derating 1%/100m. Max. 3000m Optional reinforced isolation for up to 4500m.
	Cooling	Forced air cooling, Self cleaning filters
CONTROL	Control mode	Local control (Display and push-buttons) Remote control (I/O and communications), Web display (wifi)
	Control method	V/Hz VECTOR CONTROL Open Loop: PMC speed / torque control, AVC: speed / torque control Close Loop (Encoder): PMC speed / torque control, AVC: speed / torque control
	Carrier frequency	1kHz
	Control power supply	Redundant 2x230Vac II P+N (1kVA), UPS integrated
	Other characteristics	Voltage/Power ride through, quick setting and commissioning, master-slave synchronization, skip critical frequencies, delay-off IGBT, motor pre-magnetization, flux reduction at low load (energy saver), electric DC brake, multi-reference and speed ramp, Power PLC programming, Other consult Power Electronics.
	Digital inputs	5 programmable, Active high (24Vdc), Isolated power supply 5 pre-configured (Start/Stop ; Reset, control mode, reference) 1 PTC input
	Analogue inputs	3 programmable differential inputs. 0–20mA, 4–20mA, 0–10Vdc and ± 10 Vdc. (Optically isolated)
COMMUNICATIONS	Digital outputs	2 programmable changeover relays (250Vac, 8A or 30Vdc, 8A) 3 programmables NO contacts (250Vac, 8A or 30Vdc, 8A) 3 pre-configured contacts (Start/Stop, Warning, Failure)
	Analogue outputs	3 isolated programmable outputs: 0–20mA, 4–20mA, 0–10Vdc and ± 10 Vdc
	Encoder (optional)	2 differential encoders input (process and vector control). Input signal from 5 to 24Vdc
	Standard Hardware	USB, RS232, RS485, Ethernet
	Optional Hardware	Fiber optics, 9 Pin D-SUB, CAN
	Standard Protocol	Modbus-RTU, Modbus TCP
	Optional Protocol	Profibus-DP, Devicenet, CANopen, Ethernet IP and Profinet
PROTECTIONS	Motor protections	Rotor locked, torque limit, Motor overload (thermal model), Output current limit, Phase current imbalance, Ground fault current, Phase voltage imbalance, Motor over-temperature (PTC), Speed limit, excessive starting and stopping time.
	Drive protections	Input phase loss, Low input voltage, High input voltage, maximum number of faulty modules, High input frequency, Low input frequency, drive overload, drive over-temperature, Analogue input signal loss (speed reference loss), communication loss (time-out), Power supply fault, Emergency stop
	Power modules protections	Overcurrent (fuses), high DC bus voltage, Low DC bus voltage, DC bus voltage instability, low input voltage, fiber optics communication lost, communication time overpassed (time-out), control voltage lost, gate drive fault, power module overtemperature.
	Electromagnetic compatibility	Directive EMC 2004/108/EC, IEC/EN 61800-3, IEEE 519-1992
	VSD design and construction	IEC/EN 61800-4 General requirements IEC/EN 61800-5-1 Safety IEC/EN 60146-1-1 Semiconductor converters
	MV transformer	IEC/EN 60076 -1, -11, IEC/EN 60146-1-3, IEC/EN 61378-1

[1] Other configurations, consult Power Electronics.

[2] Harmonics are below the limits defined in IEEE519 for all I_{sc}/I_L .

ELECTRONIC SOFT STARTERS

VS65

Page. 26 – 35

VS65

The most reliable and safe customer oriented solution

Power Electronics' VS65 medium voltage soft starter is the most reliable and safest solution, fully flexible with a customized arrangement of MV cells.

Applications range from 2.3kV to 13.8kV and the VS65 combines outstanding design and hardware under the most stringent IEC regulations, using advanced technology motor control and safety, allowing for smooth starts and stops under any circumstances.

From 2,3kVca
to 13,8kVca

Up to 50°C

1

Topology

Highest operation safety with internal arc approved.

2

Maximum safety

Maximum safety and outstanding features designed for the most demanding industry.

3

Maximum motor care

The VS65 soft starter includes built-in as standard the ultimate motor and soft starter protections, features that allow it to act as a motor protection relay.

4

Reliability

Our record in industrial technical service has set the boundaries to all of our designs in terms of reliability. Hence, we offer the most comprehensive and extended warranties of the market.

5

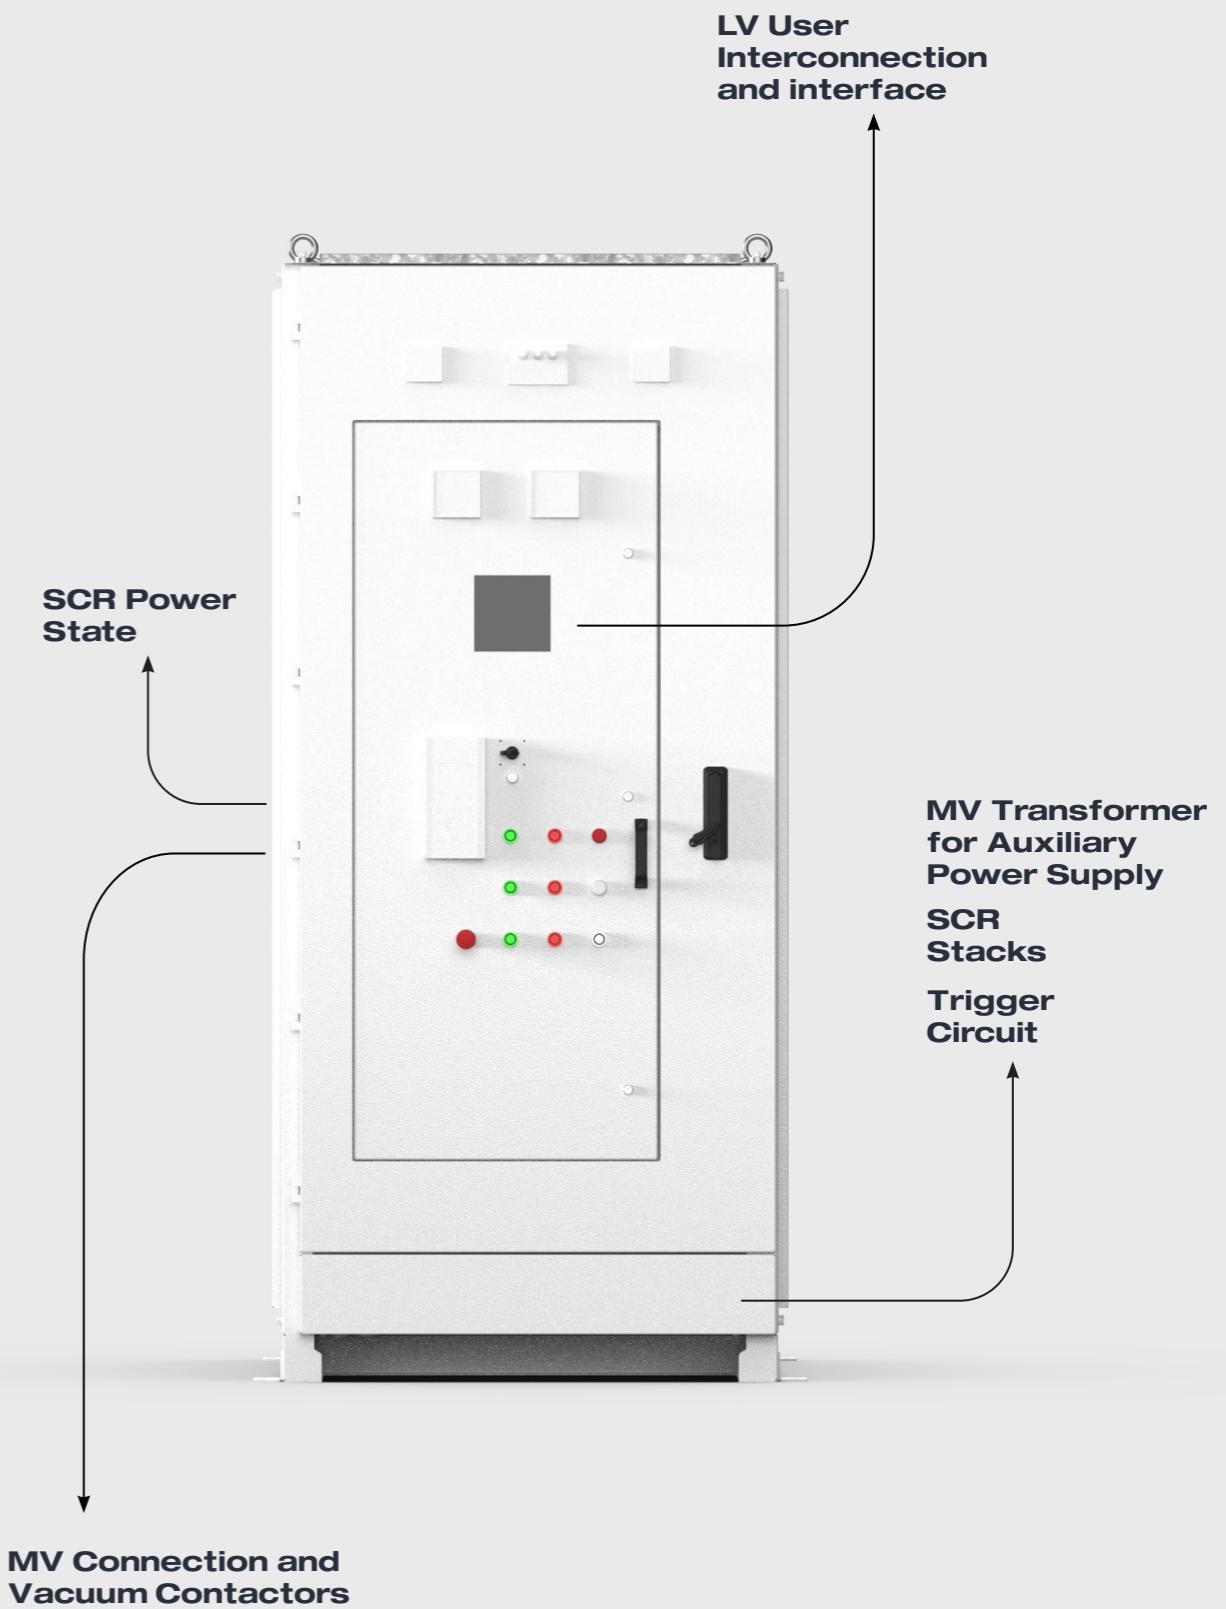

Multiple features

The VS65 soft starter gets the most from your facilities, by implementing the unique dynamic torque control algorithm (CDP) that offers an ultimate break away torque and starts the most demanding applications.

6

Easy to drive

The VS65 integrates an intuitive and dust resistant interface that includes backlit alphanumeric display with membrane keypad, status lights and pushbuttons that allow the user an easy operation and visualisation under the most demanding conditions.

VS65

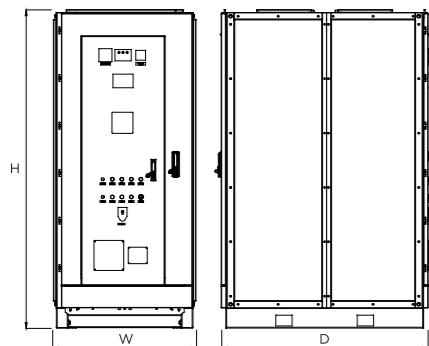

INPUT	Input voltage^[1]	2,3kVca, 3kVca-3.3kVca, 4.16kVca, 5kVac-5.5kVac, 6kVca-6.6kVac, 10kVca-11kVca, 13.8kVca ^[1]
	Input frequency	47 ~ 62Hz
	Control voltage^[1]	230Vac ±10%, 50Hz / 110Vac ±10%, 50Hz
	Phase sequence	Compatible with any phase sequence
	Transitory over voltage protection	Snubber network / Optional Surge arresters
OUTPUT	Efficiency (full load)	> 99.6%, 100% Bypass activated
	Overload	125% of the continuous rated value 100% to 500% (during 1 ~ 60s configurable)
	Bypass contactor	Capacity to start the motor in direct start mode
ENVIRONMENTAL CONDITIONS	Protection degree	IP44, IP54 (optional)
	Cooling system	Natural
	Work temperature	0°C to +50°C
	Storage temperature	-25°C to +55°C
	Humidity	5% - 95%, non condensing
	Altitude^[1]	1000m, (reinforced isolation optional for 4500masl)
	Painting^[1]	RAL 7035, C4 corrosion (ISO 12944-2)
INTERCONNECTION	Digital inputs	5 configurable input
	Analogue inputs	2 analogue inputs of 0-20mA or 4-20mA, 0-10V
	Output relays	3 switched relays (non-inductive 10A 250Vac)
	Analogue outputs	1 configurable output 0-20mA or 4-20mA
OPERATION MODES	Starting modes	Current limit starting Current ramp and current limit starting Dynamic torque control Initial torque pulse starting Direct starting
	Stop modes	Spin stop Stop by voltage ramp Stop by water hammer control
KEYPAD AND CONTROL	Display	Backlit, alphanumeric 2x16 characters
PUSH BUTTONS		5 keys: start, stop, access and scroll menu
		Status leds: ON: Green. Turned on indicates there is voltage in the control boards. RUN: Orange. Flashing shows when the motor accelerates or decelerates. When turned on indicates the motor is working. FAULT: Red. Indicates fault.
	Door mounted indicators and buttons (soft starter)	3 push buttons: Start, Stop and emergency stop 1 starting mode selector 7 status pilots (running, stopped, ready, power supply, alarm, line contactor and bypass contactor)
	Door mounted indicators and buttons (Optional Input module)	7 status pilots (Power supply L1/L2/L3, MV switches status on/off/loaded control voltage supply) 3 push buttons: switch status, connection and disconnection 1 selector of MV locking
	Display information	Current of the three phases Line average voltage Digital inputs and relays status Analogue inputs and outputs status Power supply and motor frequency Power factor Motor torque and power Fault history (5 last faults) Total and partial starts number Total and partial operation hours Partial motor consumption (kWh)

COMMUNICATIONS	Standard Hardware	RS232 / RS485
	Optional Hardware	Ethernet / 9-Pin D-SUB/F
	Standard Protocol	Modbus-RTU
	Optional Protocol	Profibus DP, Devicenet, Ethernet, IEC 61850
	Control modes	Local: from keyboard and pushbuttons Remote: from the digital and analogic inputs. PLC: start / stop
STANDARD MOTOR PROTECTIONS^[1]	Input phases sequence	
	High voltage	
	Input low voltage	
	Start current limit	
	Rotor locked	
	Motor overload (thermal model)	
	Under load

ON POWER SUPPORT

BY POWER ELECTRONICS

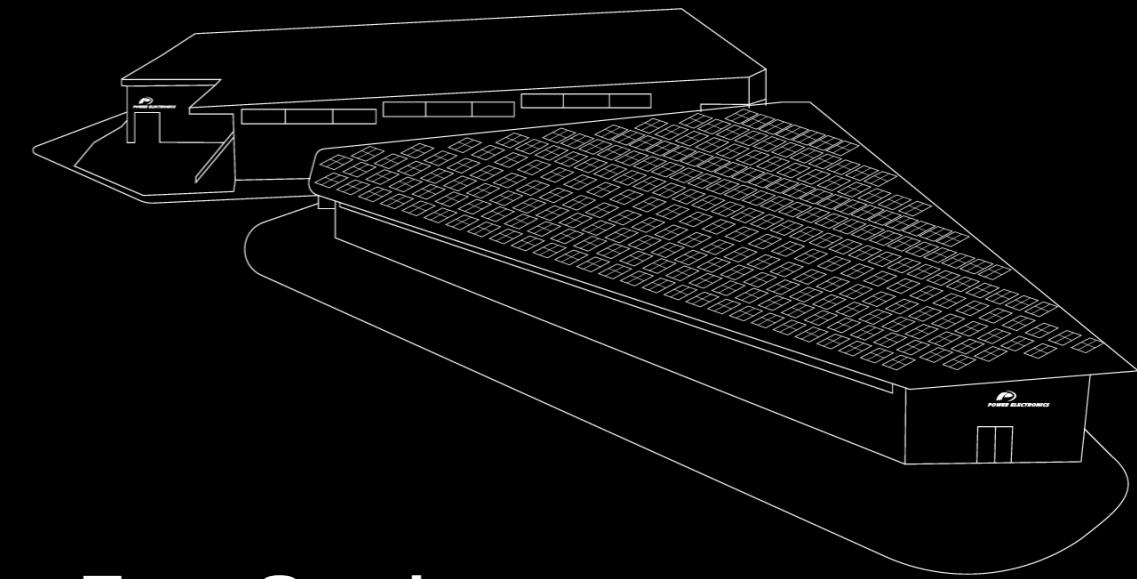

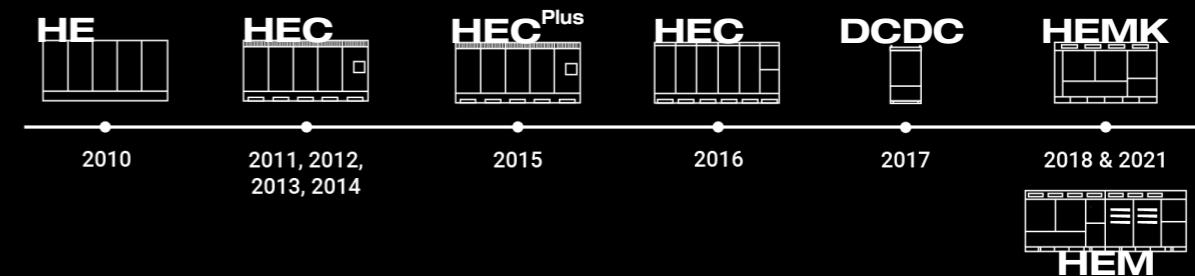

Our secret

The key of our success for more than 30 years, our 24/7 after sales service, Power On Support.

We take care of the legacy generations

Each new generation of inverters involves adapting the manufacturing lines to optimize the production of these new devices. Power Electronics has a facility optimized for the production of limited units from previous generations, where we manufacture current subcomponents adapted to equipment that is no longer in production, but which allows for an extended life.

Long Term Service

We repare subcomponents or even manufacture equivalent units in our Dedicated Service Factory located near our Production Plant.

Power Electronics has experience in repowering old photovoltaic plants, where we supply state-of-the-art equipment adapting its electrical characteristics to be compatible with the existing configuration, while providing all the advantages of the latest generation inverters.

Vertical Integration

throughout the entire process

We complement your spare parts strategy with our own thanks to our *Dedicated Service Factory warehouse*, informing you when any of them is going to be discontinued so you can plan accordingly.

- Before commissioning
 - Technical applications & design requirement review
 - Dedicated Project Management Support
 - Hands on functional & safety product training
- During commissioning
 - Dedicated commissioning teams
 - Rigorous execution on through site operation
- After commissioning
 - Support 24/7, 365 days a year
 - Full warranty coverage with options for extension and full preventative maintenance packages
 - Advanced offerings for remote monitoring, detailed performance reporting, and interactive portals for tracking metrics direct with the PE Service Org

You have the control

WARRANTY

Power Electronics (the Seller) warrants that their Products are free of faults and defects for a period of 3 years, valid from the date of delivery to the Buyer. It shall be understood that a product is free of faults and defects when its condition and performance is in compliance with its specification.

The warranty shall not extend to any Products whose defects are due to (i) careless or improper use, (ii) failure to observe the Seller's instructions regarding the transport, installation, functioning, maintenance and the storage of the Products, (iii) repairs or modifications made by the Buyer or third party without prior written authorization of the Seller, (iv) negligence during the implementation of authorized repairs or modifications, (v) if serial numbers are modified or illegible, (vi) anomalies caused by, or connected to, the elements coupled directly by the Buyer or by the final customer, (vii) accidents or events that place the Product outside its storage and operational specification, (viii) continued use of the Products after identification of a fault or defect.

The warranty excludes components that must be replaced periodically such as Fuses + DC switch, lamps & air filters or consumable materials subject to normal wear and tear.

The warranty excludes external parts that are not manufactured by the Seller under the brand of Power Electronics.

The Seller undertakes to replace or to repair, himself, at their discretion, any Product or its part that demonstrates a fault or defect, which is in conformance with the aforementioned terms of the warranty. Reasonable costs associated with the disassembly/ assembly, transport and customs of equipment will also be undertaken by the Seller except in cases of approved intervention by the Buyer and/or their representative where cost allocation has been previously agreed.

Power Electronics reserves the right to modify whole or part of the content of this brochure at any time and without prior notice. December 2021.
